

**Loraas Disposal and Transverto Technologies**

**Working together to provide a more sustainable environment**

Transverto uses a proprietary composting system to convert organic waste into a soil enriching compound. This new system produces the soil compound in a fraction of the time of wind roll composting, reduces odour and captures methane gas—one of the most potent greenhouse gases.

Together we will provide a waste management solution that will reliably reduce, recycle and regenerate waste and its by-products into products that can be re-used in various industries starting with the agricultural industry in Canada.

**Our Services:**

- Loraas provides a 95-gallon green cart.
- Year-round service.
- Weekly collection from April to October, once per month November to March.
- Place the green cart at the curb the same as your waste or recycling cart.

**ACCEPTABLE ORGANICS**

ALL ITEMS MUST BE UN-PACKAGED

Soiled Cardboard

Breads, Rice & Pasta

Cut Flowers

Un-bagged Leaves

Coffee Grounds, Filters &
