Dear Neighbor,

**RE: TransGas Limited – Maintenance & Flare Notification  
NE 23-17-21 W2M**

Please be advised that TransGas Limited (TransGas), a wholly owned subsidiary of SaskEnergy Incorporated, is planning to complete a scheduled flare at the above location. The flare is in conjunction with upcoming maintenance work taking place in the area.

The flare will be conducted on **Monday, July 29<sup>th</sup>** at the existing TransGas Block Valve Site, which is located within the RM of Sherwood and west of the Global Transportation Hub approximately 3.5km Northeast of the Town of Grand Coulee, While the infrastructure is isolated from the rest of the system, flaring is required to remove the remaining gas prior to work commencing. Flaring is an industry standard procedure when natural gas needs to be released from a gas line and reduces the carbon footprint of the vented natural gas by 85 per cent. For more information regarding flaring and its purposes, please refer to the SaskEnergy video at the following link [SaskEnergy Spotlight: Natural Gas Flaring](#).

The proposed schedule is from **8:00am to 3:00pm** on the above noted date, which is subject to change based on operating requirements. Please note there will be no interruptions to existing residential gas services during these activities.

Scheduled work on our facilities and infrastructure supports the safe and reliable delivery of natural gas to all customers. All proposed work is being conducted in accordance with industry best practices and complies with associated provincial regulations.

We appreciate your patience and cooperation with this scheduled work. If you have any questions or concerns regarding the work or the proposed schedule, please contact me at 306-750-3002 or [gdaaviduk@saskenergy.com](mailto:gdaaviduk@saskenergy.com).

Sincerely,

Graham Daviduk  
Land Consultant – Land Services, SaskEnergy Incorporated
